

Timeflow QA Defect & Quality Report

Module: Employee Module & Timesheets Workflow | **Target Role:** Standard Employee
(shubham.shinde@setoo.co)

Target System: https://timeflow.setoo.in	Environment: Staging / Production QA
Test Suite: Employee Suite (EMP-AUTH, EMP-PERM, EMP-TS, EMP-SYNC, EMP-VIEW, EMP-SUB)	Execution Framework: Selenium WebDriver 4 + TestNG
Total Automated Tests: 20 Passed (0 Failed)	Audit Date: August 2026

1. Executive Summary & Quality Assessment

The Employee module provides daily work logging, weekly timesheet drafts, task synchronization, and self-service allocation/calendar visibility. While the core authentication and automated navigation flows pass all functional assertions, critical usability and validation defects were identified around zero-hour draft submission safeguards, asynchronous sync button debouncing, and historical period pagination state consistency.

Total Defects Logged	Critical / Blocker	Major / High	Normal / Medium	Minor / Low
5	0	1	2	2

2. Automated Test Suite Execution Matrix

#	Test Method Name	Scope & Verification Focus	Status
1	testEmployeeValidLogin	EMP-AUTH-001: Verifies successful authentication and /dashboard redirection.	PASSED
2	testInvalidPasswordRejected	EMP-AUTH-002: Verifies error handling and login stay on wrong password.	PASSED
3	testUnknownEmailRejected	EMP-AUTH-003: Ensures un-registered domains/emails cannot proceed.	PASSED
4	testEmptyLoginFieldsValidation	EMP-AUTH-004: Validates client-side HTML5/JS required field triggers.	PASSED
5	testProtectedRouteRedirectWhenUnauthenticated	EMP-AUTH-005: Verifies direct /timesheets navigation redirects to /login.	PASSED
6	testSessionPersistsOnRefresh	EMP-AUTH-006: Verifies JWT token and session state persist on F5 reload.	PASSED
7	testEmployeeCanAccessOwnTimesheets	EMP-PERM-001: Confirms employee can view personal timesheet data.	PASSED
8	testEmployeeCannotAccessAdminRoutes	EMP-PERM-002: Confirms direct navigation to /admin or /settings is denied.	PASSED
9	testEmployeeNavigationPermissions	EMP-PERM-005: Asserts sensitive manager/admin links are hidden in sidebar.	PASSED
10	testTimesheetsHeaderAndControls	EMP-TS-001: Validates Timesheets header, 'Sync', 'Save draft', 'Submit week'.	PASSED
11	testTaskSynchronizationTrigger	EMP-SYNC-001: Validates 'Sync My Tasks' triggers Jira/backend sync.	PASSED
12	testDateViewsSwitching	EMP-VIEW-001: Confirms switching between Daily, Weekly, and Monthly views.	PASSED
13	testDateNavigationControls	EMP-VIEW-005: Confirms Previous/Next chevron period pagination.	PASSED
14	testSubmitWeekModalWorkflow	EMP-SUB-001: Tests 'Submit week' modal display, cancel, and submission flow.	PASSED
15	testEmployeeDashboardUI	EMP-DASH-001: Verifies Tasks Table, Quick Links, and User Avatar on Dashboard.	PASSED
16	testMyTasksModuleNavigation	EMP-TASK-001: Verifies /tasks page navigation and task cards rendering.	PASSED
17	testMyAllocationModuleNavigation	EMP-ALLOC-001: Verifies /my-allocation project percentages and dates.	PASSED
18	testCalendarModuleNavigation	EMP-CAL-001: Verifies /calendar view loading and event rendering.	PASSED
19	testGlobalSearchTrigger	EMP-SRCH-001: Confirms CMD+K / Search trigger opens search modal dialog.	PASSED
20	test1_1_UnauthorizedAccess_EmployeeBlockedFromBilling	RBAC-001: Verifies Employee is completely blocked from /billing.	PASSED

3. Detailed Defect Logs & Developer Fix Instructions

The following issues have been documented with step-by-step reproduction flows, actual vs. expected results, technical root cause analysis, and recommended remediation for QA and Developers.

DEF-EMP-001: Zero-Hour / Empty Draft Timesheet Submission Allowed Without Blocking Warning Modal

Severity: High		Priority: High	Component: Timesheet Submission (SubmitWeekModal / TimesheetsPage)	Route: /timesheets
Pre-conditions	Employee logged in with 0.0 total logged hours recorded in the current active week draft.			
Steps to Reproduce	1. Sign in as standard Employee (shubham.shinde@setoo.co). 2. Navigate to Timesheets page (/timesheets). 3. Ensure all daily hour cells are 0 or empty for the current week. 4. Click on the primary 'Submit week' button located at the top-right toolbar. 5. Observe modal prompt and network request payload.			
Expected Result	The system should block submission on the client side with a clear toast/alert: 'Cannot submit a timesheet with 0 hours logged' or require explicit zero-hour confirmation.			
Actual Result	The Submit confirmation dialog opens unconditionally, allowing users to submit zero-hour entries which flood the manager's approval queue with empty records.			
Technical Root Cause	Submit button event handler in TimesheetHeader.tsx lacks a pre-flight validation check on totalWeeklyHours > 0 before setting isSubmitModalOpen = true.			
Impact Analysis	Pollutes manager approval queue with invalid timesheet submissions and requires manual rejection overhead.			
Suggested Dev Fix	Add validation guard: if (totalWeeklyHours === 0) { toast.error('Timesheet contains 0 hours. Please log hours before submission.');			

DEF-EMP-002: Sync My Tasks Button Lacks Debouncing / Loading Spinner During Asynchronous Sync

Severity: Medium	Priority: Medium	Component: Timesheet Toolbar (EmployeeTimesheetsPage)	Route: /timesheets
Pre-conditions	Employee has assigned Jira/GitLab tasks.		
Steps to Reproduce	1. Navigate to /timesheets. 2. Rapidly double-click or triple-click the 'Sync My Tasks' button in succession. 3. Observe the Network inspector in browser developer tools.		
Expected Result	Button should disable immediately on the first click, display a spinning loader icon (aria-busy='true'), and ignore subsequent clicks until the API response resolves.		
Actual Result	Button remains active and clickable without a loading state, firing multiple parallel POST /api/tasks/sync requests and triggering duplicate toast notifications.		
Technical Root Cause	The click handler does not set an internal isSyncing state or disable the button during promise resolution.		
Impact Analysis	Unnecessary load on backend task-sync microservice and potential race conditions in client cache.		
Suggested Dev Fix	Wrap onClick in debounced state: <code>const [isSyncing, setIsSyncing] = useState(false); disable button when isSyncing is true.</code>		

DEF-EMP-003: Date Navigation Controls Permit Unbounded Historical Pagination and Reset Active View Tab

Severity: Medium	Priority: Medium	Component: Timesheet Date Navigator	Route: /timesheets
Pre-conditions	Employee on /timesheets.		
Steps to Reproduce	1. Switch Timesheet view from 'Weekly' to 'Monthly'. 2. Click the 'Previous Period' chevron arrow repeatedly past the user's hire date or company inception date. 3. Observe the active view tab switcher and date range banner.		
Expected Result	The date navigator should enforce a minimum historical threshold (or disable the previous arrow) and preserve the selected 'Monthly' view mode.		
Actual Result	Pagination allows navigating back infinitely into past years where no data exists, and occasionally resets the view mode back to default 'Weekly'.		
Technical Root Cause	Active view state is not stored in URL search parameters (?view=monthly&date;=2026-08), causing state loss during re-renders.		
Impact Analysis	Confusing user experience when navigating historical timesheets.		
Suggested Dev Fix	Persist view mode in URL search params via react-router useSearchParams and set disabled={currentPeriod <= minPeriod} on chevron buttons.		

DEF-EMP-004: Global Search Modal Focus Trap Fails to Retain Tab Navigation on Mobile / Narrow Viewports

Severity: Low		Priority: Low	Component: Global Search (CMDK Dialog)	Route: /dashboard, /timesheets
Pre-conditions	Viewport width set below 768px or tablet resolution.			
Steps to Reproduce	1. Trigger Global Search by clicking the search bar or pressing Cmd+K. 2. Press the Tab key on the keyboard 4 to 5 times. 3. Observe focused element outline.			
Expected Result	Focus should cycle exclusively between search input, result list items, and the close button.			
Actual Result	Keyboard focus escapes the modal container and focuses hidden background navigation links underneath the overlay.			
Technical Root Cause	Radix UI DialogContent component is missing loop={true} and trapFocus={true} configuration in the responsive drawer wrapper.			
Impact Analysis	WCAG 2.1 accessibility compliance violation for keyboard and screen-reader users.			
Suggested Dev Fix	Ensure FocusScope trap={true} is active on the Radix Dialog root container.			

DEF-EMP-005: My Tasks Grid Columns Truncate Text Badly Without Tooltips on 1080p Split-Screen Viewports

Severity: Low		Priority: Low	Component: Tasks Table (EmployeeTasksPage)	Route: /tasks
Pre-conditions	Browser window resized to 50% width (960px).			
Steps to Reproduce	1. Navigate to /tasks. 2. View task rows with long project or task descriptions (> 40 characters). 3. Hover mouse over truncated text.			
Expected Result	Truncated text ends with an ellipsis (...) and displays the full title on hover via a tooltip.			
Actual Result	Text is abruptly clipped at the cell boundary without an ellipsis or hover tooltip.			
Technical Root Cause	Table cell CSS has overflow: hidden but lacks text-overflow: ellipsis and white-space: nowrap with a Tooltip wrapper.			
Impact Analysis	Minor readability issue for users operating on split-screen monitors.			
Suggested Dev Fix	Apply Tailwind truncate class and wrap task title in ...{fullTitle}.			

4. Quality Engineering Recommendations & Next Steps

- **Implement Zero-Hour Submission Guard:** Enforce frontend validation preventing submission of drafts with 0 total hours.
- **Debounce Async Actions:** Add button loading indicators and disable state during 'Sync My Tasks' and 'Save draft' API calls.
- **Synchronize URL State:** Store current timesheet view (Daily/Weekly/Monthly) and active date range in query parameters.
