

Timeflow QA Defect & Quality Report

Module: Project Manager (PM) Module & Billing Dashboard | **Target Role:** Project Manager (rohan@setoo.co)

Target System: https://timeflow.setoo.in	Environment: Staging / Production QA
Test Suite: PM Suite (PM-001 to PM-007, Billing Access, Budget Guards)	Execution Framework: Selenium WebDriver 4 + TestNG
Total Automated Tests: 9 Passed (0 Failed)	Audit Date: August 2026

1. Executive Summary & Quality Assessment

The Project Manager module governs project creation, milestone tracking, client assignments, and billable hour financial tracking. Automated test execution verified that PM users have full access to the Billing & Accounts Dashboard (/billing) while being properly restricted from unauthorized budget configuration mutations (TC 1.3). High-priority defects were logged around Extra Burned hour double-counting on timesheet revisions, case-sensitive project search, and missing visual alerts when consumption exceeds 100%.

Total Defects Logged	Critical / Blocker	Major / High	Normal / Medium	Minor / Low
4	1	1	1	1

2. Automated Test Suite Execution Matrix

#	Test Method Name	Scope & Verification Focus	Status
1	testPMAuthenticationAndDashboardUI	PM-001: Verifies PM login, dashboard landing, and profile avatar.	PASSED
2	testPMNavigationPrivileges	PM-002: Verifies PM links (Projects, Billing, Approvals, Bandwidth, Reports).	PASSED
3	testPMProjectsModuleNavigation	PM-003: Verifies Projects list, project status badges, and team assignments.	PASSED
4	testPMBillingAndBudgetModuleNavigation	PM-004: Verifies Billing & Budget dashboard navigation and layout.	PASSED
5	testPMApprovalsModuleNavigation	PM-005: Verifies PM access to the timesheet approvals queue.	PASSED
6	testPMReportsAndTeamNavigation	PM-006: Verifies PM reports generation and team directory views.	PASSED
7	testPMGlobalSearchTrigger	PM-007: Verifies CMD+K global search for projects, milestones, and users.	PASSED
8	test1_2_AuthorizedView_PMAccessesBillingDashboard	RBAC-PM-001: Validates PM access to financial stat cards and client summary.	PASSED
9	test1_3_BudgetConfigurationGuard_RestrictedForPM	RBAC-PM-002: Confirms PM is blocked from POST /billing/budgets mutation.	PASSED

3. Detailed Defect Logs & Developer Fix Instructions

The following issues have been documented with step-by-step reproduction flows, actual vs. expected results, technical root cause analysis, and recommended remediation for QA and Developers.

DEF-PM-001: Extra Burned Billable Hours Calculation Double-Counts Revised Timesheet Entries

Severity: Critical		Priority: High	Component: Billing & Budget Calculation Engine (BillingPage)	Route: /billing
Pre-conditions	Project with 100 planned hours. Employee logged 20 hrs, had it approved, then edited to 25 hrs and re-approved.			
Steps to Reproduce	1. Login as Project Manager (rohan@setoo.co). 2. Navigate to Billing & Accounts Dashboard (/billing). 3. Locate the project card and inspect 'Total Consumed' and 'Extra Burned' metrics.			
Expected Result	Total Consumed should equal 25.0 hrs. Remaining Balance should equal 75.0 hrs. Extra Burned should equal 0.0 hrs.			
Actual Result	Total Consumed displays 45.0 hrs (20 hrs initial + 25 hrs revised), prematurely triggering Extra Burned metrics.			
Technical Root Cause	The SQL/Prisma aggregation query sums all timesheet records with status = 'APPROVED' without filtering on is_current_version = true or deducting superseded revisions.			
Impact Analysis	Skewed financial reporting, incorrect client billing estimates, and false over-budget panic for project managers.			
Suggested Dev Fix	Update query: <code>SELECT SUM(hours) FROM timesheets WHERE project_id = ? AND status = 'APPROVED' AND is_latest_revision = TRUE;</code>			

DEF-PM-002: Projects Management Search Filter is Case-Sensitive and Misses Partial Matches

Severity: High		Priority: Medium		Component: Projects Filter (PMPProjectsPage)		Route: /projects	
Pre-conditions		Projects exist with client names like 'Setoo Technologies' and 'Acme Corp'.					
Steps to Reproduce		1. Navigate to Projects page (/projects). 2. In the search input box, type 'setoo' in all lowercase letters. 3. Inspect the filtered project card grid.					
Expected Result		All projects associated with 'Setoo Technologies' should appear in the results list.					
Actual Result		Grid shows 'No projects found matching setoo'. Results only populate if exact uppercase 'Setoo' is entered.					
Technical Root Cause		The filter predicate uses project.clientName.includes(searchTerm) without normalizing strings to lower case.					
Impact Analysis		Degrades PM workflow efficiency when quickly searching through large client project rosters.					
Suggested Dev Fix		Use normalized comparison: project.clientName.toLowerCase().includes(searchTerm.toLowerCase().trim()).					

DEF-PM-003: Budget Progress Bar Colors Do Not Transition to Alert Red State When Consumption > 100%

Severity: Medium		Priority: Medium	Component: Billing Stat Cards & Project Progress Bar	Route: /billing
Pre-conditions	A project where Total Consumed (120 hrs) exceeds Total Planned Billable (100 hrs).			
Steps to Reproduce	1. Navigate to /billing. 2. Scroll to Project Billable Hours section. 3. Inspect the progress bar for the over-burned project.			
Expected Result	Progress bar fill should change from standard purple/blue to vibrant warning red (#EF4444) with an 'Over Budget by 20 hrs' badge.			
Actual Result	Progress bar remains purple/blue, stretches past 100% width causing slight container overflow, and provides no clear visual alert.			
Technical Root Cause	Component has static class className='bg-primary' rather than conditional styling based on percentage > 100.			
Impact Analysis	PMs can easily overlook budget overruns without immediate visual hierarchy indicators.			
Suggested Dev Fix	Apply dynamic styling: className={cn('h-2 rounded-full', isOverBudget ? 'bg-destructive' : 'bg-primary')}.			

DEF-PM-004: Project Milestone Modal Allows End Date to Precede Start Date in Form Submission

Severity: Low		Priority: Low	Component: Project Details / Milestone Editor	Route: /projects/[id]
Pre-conditions	PM on project details view attempting to create or edit a milestone.			
Steps to Reproduce	1. Open 'Add Milestone' modal dialog. 2. Select Start Date: September 15, 2026. 3. Select End Date: September 01, 2026. 4. Click 'Save Milestone'.			
Expected Result	Form validation should block submission and show an inline error below End Date: 'End date cannot be earlier than start date'.			
Actual Result	The form submits, and only after an API roundtrip does a generic 'Bad Request 400' error toast appear.			
Technical Root Cause	Form schema validation (Zod schema) lacks a .refine() rule checking data.endDate >= data.startDate.			
Impact Analysis	Poor user experience requiring full network roundtrip for basic date logic.			
Suggested Dev Fix	Add Zod refinement: .refine((data) => data.endDate >= data.startDate, { message: 'End date must be after start date', path: ['endDate'] }).			

4. Quality Engineering Recommendations & Next Steps

- **Fix Revision Deduplication Query:** Ensure timesheet aggregation logic strictly filters by latest approved version.
- **Implement Over-budget Visual Alerts:** Render red badges and alert styling when consumed hours exceed planned budget.
- **Normalize Client Search Queries:** Make project and client search case-insensitive across all PM pages.
